Secure your business objectives by managing risks better

World class solutions from risk management practitioners

A mature ERM process offers strategic advantages to Organizations since several value levers get unlocked along the journey. At Udbhata, we can help you accelerate this in a meaningful way.

Milestone 1
Transparency and Compliance

The first milestone is to have a compliant ERM framework and process. At this milestone, you are identifying risks and dealing with them in an organized manner. You have an approved ERM policy, a risk prioritization and reporting framework and you are keen to manage enterprise-wide risks

How Udbhata can support you here?
- Daksa Udbhata's ERM workshop
- Customized training and workshops
- On-call CRO or coaching
- Risk management consulting

Milestone 2
Improvement in residual risk

You reach this milestone by expanding risk management policies to incorporate risk appetite, monitoring mechanisms and allocation of Organization resources. Risk assessment is more objective and often uses metrics or quantified risk information. Having a reliable and functioning risk governance process is the goal here.

How Udbhata can support you here?
- Dipsticks and ERM maturity evaluations
- Customized training and workshops
- Risk management consulting

Milestone 4
Competitive advantage

At this milestone, risk management thinking is in the DNA of all processes, decisions and business strategy, be it entering a country, acquiring a product or business or validating your Organization Strategy. There is alignment between the assurance team members, business and organizational performance. For your ERM serves as a competitive advantage.

Milestone 3
Risk - reward optimized

In addition to managing risk compliance and governance, at this milestone, you want your ERM function to add value to your organization. You have an understanding of how to quantify risk and use the information in your processes and decisions.

How Udbhata can support you here?

- **Risk management consulting**
- **Special risk assessment or quantification projects (pricing)**
- **Insurance and Strategy (Balance Score Card) integration**
- **Qoris® ERM sofware solution**

Organizations new to ERM, or have just begun their ERM journey

Nominate your associates to Daksa , our highly rated two-day ERM workshop. Daksa is conducted twice a year in Mumbai and Hyderabad.

Alternatively kickstart your ERM implementation via a two- day customized risk identification workshop.

Or simply seek a 30-minute discovery call with us to simply figure out how to get started.

Organizations keen on enhancing their current ERM program's value

We can carry out a dipstick assessment of your current ERM program maturity and recommend opportunities to improve - all in a week!

We can help build organizational or team capability in ERM via customized workshops, mentoring and onsite consulting (ERM implementation projects)

Organizations seeking to integrate ERM thinking into their business process or strategy execution

Engage Udbhata for "capsule assignments" to identify and unlock levers of value in your current ERM program - these could be to implement a risk quantification framework, introduce risk thinking into product, pricing or investment decisions or to integrate ERM into your organization's strategy.

Qoris® ERM software solution

Experience the power of managing risks with our ERM sofware solution. Login to qoris.io for more details.
